

## SHOEBURY COMMON FLOOD DEFENCE

Southend Councils preferred scheme involves a 1km (0.65 miles) long secondary flood defence wall at 1.98 metres high, plus 1.4 metre high railings, starting from the MOD wall down to St Augustine Avenue and includes several floodgates from 2.5 to 8.0 metres wide. Although the wall is only 400mm wide, it will have an additional 4 metre wide (13 feet) crest of soil with steep ramps & stairs for public access.

Access for disabled & infirm will be restricted

Emergency vehicle access also restricted

Security risk / vandalism increased once enclosed

Serious risk crossing road, flood gate & cycle path

Sea views destroyed & resident's privacy lost

Reduced car parking and loss of Leisure space

### **OUR SUGGESTED ALTERNATIVE INVOLVES:**

- \* Raising boat ramp by 900mm to match MOD wall
- \* Raising existing promenade / walkway by 550mm
- \* Soil used will strengthen existing sea wall
- \* Provide new 400mm high wall for added protection
- \* Raise promenade beach huts by 550mm to match
- \* Provide new secure beach huts on raised level
- \* Use existing huts if owners prefer this option
- \* Use free soil for promenade & low-level banks
- \* Surplus soil to be used on other high risk areas
- \* All other areas to remain including flood plain
- \* Beach re-charge / maintenance in separate budget
- \* This option would be considerably cheaper

## SHOEBURY COMMON FLOOD DEFENCE

**We  
URGENTLY  
Need your  
Support to  
STOP this wall  
Being built**

**If possible  
Please email us  
So we can add  
Your name to  
Our circulation  
List or we can  
Provide you  
With further  
Information  
If requested**

**Or write to Ray Bailey @  
91 Parkanaur Avenue Thorpe Bay  
Southend-on-Sea Essex SS1 3JA  
Tele: 01702-585332**

**Shoebury Common is under threat of destruction by Southend Council.**

**West Shoebury Conservative Councillors Jarvis, Cox & Day are leading the charge.**

**They plan to ignore existing Covenants that protect Shoebury common as an open space for recreation, which benefits residents & visitors alike. It was hoped to rush through planning in 2012 to use the Cliffs soil as a second line of sea defence, in what is classified a “low risk” area. The existing sea wall should be their priority. No public consultation has taken place to date.**

**This preferred scheme is a luxury we cannot afford. In May 2012 it was £2m but this has risen to £4.6m & the total cost could be up to £10m if you include rebuilding / maintenance costs for the existing sea wall & re-charging the beach with sand, which is still required. The New Ranges, East Beach, Leigh & Westcliff are at greater risk of flooding. Urgent improvements are required at New Ranges, but despite being at greater risk, it is not scheduled to start until 2018 – Why? They have several thousand tons of soil already stored nearby at Gunners Park**

**The council claim this scheme will protect 500 homes, which we dispute, but they cannot provide a list of the properties involved.**

**We have raised concerns about criminality once fully enclosed, the impact on the elderly & disabled gaining access to their beach huts & promenade, increased risk of flooding from storm water, loss of car parking spaces, loss of privacy to adjacent properties, health & safety issues when crossing the road or walking through the flood gates / cycle paths, to name but a few.**

**An alternative scheme has been submitted to the council, which we believe would be far cheaper and is detailed on the back page. There are no services under the promenade & lifting the promenade will strengthen to existing sea wall. Because the new wall is being built around 20 metres back from the existing, it needs to be 1.4m high to reach the top of the existing sea wall. The existing wall only needs to be 900mm high to offer the same protection. Walk from St Augustine Avenue to the Yacht Club and you will see the existing sea wall is between 3 metres to 1.4 metres above high sea levels now, so why do we need a secondary wall behind?**

**Before it is too late, please support our campaign and register your details with us now –**

**Southend Council have now agreed to hold a Public consultation meeting on 22<sup>nd</sup> April 2013 from 7.00pm @ Shoebury High School Sports Hall. The council will advise further details  
**PLEASE MAKE SURE YOU ATTEND****

**Thank you for your support**

Existing Sea wall  
550mm high
