

## How to use

Turn your phone off IMMEDIATELY after it comes in contact with water & Do NOT attempt to charge it. This will dramatically increase your chances of reviving your phone.

- Step 1** Carefully pour the Reviveaphone solution in to the pouch.
- Step 2** Ensure that the phone is powered down.  
Remove the battery if possible (for iPhones or other phones where the battery is integral, ensure that the phone is powered down). Place your phone (and battery) inside the pouch with the solution. Leave for 7 minutes
- Step 3** Remove the phone from the pouch and place it in to the supplied tray.  
Then carefully dispose of the Reviveaphone solution.
- Step 4** Leave the phone in the tray to dry for 24 hours.
- Step 5** After 24 hours (replace the battery) power up the phone. it should be fully restored! if your phone still doesn't work, don't panic! Leave the phone to dry for a further 24 hours.

*Note: Reviveaphone is not designed for use on partially functioning phones.*
